SUMMARY

Software Engineer with 3+ years of experience building cross-platform mobile, web, and desktop applications using Flutter, FastAPI, and PostgreSQL. Experienced in REST API integration, CI/CD automation, scalable application architecture, and multi-environment deployments. Built production applications across railway operations, healthcare, POS, and wellness domains. Skilled in Flutter state management, backend development, and performance optimization in Agile development teams.

SKILLS

Mobile Development: Flutter (Advanced) · Multi-platform · Push Notifications

Architecture: Clean Architecture · MVVM & Modular

Backend: Node.js · REST APIs · Firebase · ObjectBox/Hive · FastAPI

Tools: Git & GitHub · Postman · Android Studio

AI / ML: Machine Learning

Languages: Dart · Java · JavaScript · Python

State Management: BLoC · Provider · Riverpod · GetX

Realtime: Socket.IO · TCP/Socket

Design: Figma

Professional: Team Leadership · Code Review · Debugging

PROFESSIONAL EXPERIENCE

Lead Flutter Developer

Sarva Suvidha en Pvt Ltd • Patna, India (Remote) — June 2025 - Present

- %¸ Leading development of mission-critical railway apps (RailOps, CoSathi).
- %¸ Architected scalable Flutter solutions using Provider and REST APIs.
- %¸ Integrated biometric authentication and real-time data syncing.
- %¸ Mentored the development team and established code-quality standards.
- %¸ Delivered secure, production-ready logistics management systems.

Flutter · Provider · REST APIs · Biometric Auth · Clean Architecture

Software Developer (Flutter)

WellnessZ • Remote, India — Aug 2024 - May 2025

- %¸ Built the WellnessZ web platform and integrated it with the companion Flutter app via REST APIs.
- %¸ Delivered new product features end-to-end within a cross-functional team, improving release stability.
- %¸ Diagnosed and resolved data synchronization and database defects, reducing recurring production issues.
- %¸ Implemented state management using Riverpod to ensure responsive user experiences.

Flutter · Flutter Web · Riverpod · REST APIs

Flutter Developer

Incrasoft Pvt Ltd • Hyderabad, India — December 2023 - July 2024

- %¸ Delivered production-grade Flutter applications.
- %¸ Collaborated with cross-functional teams for seamless integration.
- %¸ Adapted to new technologies, boosting team productivity.
- %¸ Debugged complex software issues resulting in stable releases.
- %¸ Maintained high code quality and development standards.

Flutter · Dart · REST APIs · Git · Agile

LICENSES & CERTIFICATIONS

Tata — Data Visualisation: Empowering Business with Effective Insights
Forage (in partnership with Tata Consultancy Services) • Issued July 2023
Credential ID: 3e4s3BLTkoQYw8znZ

Tata — ESG Job Simulation
Forage (in partnership with Tata Consultancy Services) • Issued July 2023
Credential ID: QbNuAyvbmqdECPaLR

Infosys — Power Programmer Job Simulation
Forage (in partnership with Infosys) • Issued April 2022
Credential ID: FW93vd2ZwZ62uqggv

Accenture Nordics — Developer Job Simulation
Forage (in partnership with Accenture Nordics) • Issued February 2022
Credential ID: yEhtXmjydK8tJHn5Z

Railway Station Surveillance Platform

Enterprise-grade React web app for real-time CCTV surveillance across railway stations, enabling complete train (Malgadi) tracking. Streams live & recorded feeds, supports video playback with smooth pagination, full PDF report generation and one-click video download, with role-based access and high-performance lazy video loading for 24/7 monitoring.

React JavaScript REST APIs PDF Generation Video Streaming

Restaurant POS & Terminal Ecosystem

Built the RH POS terminal ecosystem in Flutter: a Windows POS terminal, an Android captain/waiter app, and a Kitchen Display System (KDS) app. Architected an offline-first terminal and captain app with ObjectBox local persistence, syncing orders in real time over LAN via Socket.IO and custom TCP/UDP channels across the terminal, captain devices and KDS. Implemented Bluetooth thermal bill/KOT printing with PDF generation and pre-warmed Google Font caching to remove first-print latency, plus REST integration via Dio and sales analytics dashboards using fl_chart. Added secure cloud database backup/restore using AWS S3-compatible storage with HMAC-SHA256 signed requests.

Flutter GetX ObjectBox Dio Socket.IO fl_chart PDF Generation Bluetooth Printing AWS S3 Google Fonts

Restaurant Admin & Customer Ordering Web App

Built the companion React + Vite web back-office for RH POS, spanning 14 management modules (live orders, billing, menu, inventory, reports, tables, users). Implemented JWT auth with proactive token refresh and role/permission-based access control, plus English/Hindi/Arabic (RTL) multilingual support. Developed a companion customer-facing ordering website integrated with the back-office.

React.js Vite JWT i18next REST APIs RBAC

Railway Defect Reporting Platform · Sarva Suvidhaen

Built a cross-platform Flutter app (Android + Web) for DFCCIL field engineers to report railway defects (hot axles, brake binding, wheel defects) with photo/video evidence and GPS tagging, as part of the railway applications portfolio at Sarva Suvidhaen Pvt Ltd. Architected an offline-first submission workflow with a persistent photo-upload queue that survives app restarts and auto-retries on reconnection, ensuring zero data loss in low-connectivity environments. Implemented JWT auth with transparent token refresh via custom Dio interceptors, and optimistic UI updates for a seamless user experience during network delays. Automated CI/CD pipelines using GitHub Actions to deploy web builds to Netlify and Android App Bundles to the Play Store production track on every main branch push.

Flutter Dart BLoC Dio GitHub Actions Offline-First

Railway Operations Management

Production-grade railway operations app using Provider and Clean Architecture. Integrated RESTful APIs, robust error handling, SMS autofill, biometric login (fingerprint & face) and secure data flows. Led team tasks and ensured code quality.

Flutter Provider REST APIs Biometric Auth Team Lead

Train Service Staff Management

App for coach attendants and train service staff with notification-based task updates, attendance workflows and service-check modules — built with Provider, Clean Architecture and RESTful APIs with role-based permissions.

Flutter Provider Push Notifications REST APIs RBAC

Offline-Capable Desktop Voice Assistant

Offline-capable desktop voice assistant that classifies spoken commands using a trained scikit-learn + NLTK intent model. Engineered a modular architecture with speech-to-text listening, text-to-speech responses, and an action executor for application launches, system controls, and automated queries.

Python Machine Learning scikit-learn NLTK Speech Recognition

Multi-Country VPN Client

VPN app with GetX state management and Hive local storage. Features 19+ countries, real-time connection status, search functionality and integrated Google Mobile Ads, using a free public VPN API for server data.

Flutter GetX Hive HTTP Google Ads

Health & Fitness Tracking

Comprehensive wellness platform for health tracking with mobile and web versions. Responsive web app with health tracking, personalized recommendations and user-friendly dashboards, ensuring feature parity across platforms.

Flutter Flutter Web Responsive Design Firebase REST APIs

Coaching Services Management

Platform for managing student coaching services with Riverpod state management. Integrated the Cashfree payment gateway for secure transactions, with user-friendly access to courses and schedules.

Flutter Riverpod Cashfree Payment Gateway REST APIs

Healthcare Appointment Booking

Healthcare app for appointment booking and medicine ordering using GetX. Leveraged RESTful APIs for efficient data handling with a token-based secure access system.

Flutter GetX REST APIs Token Auth Healthcare

Sandipani Technical Campus, Latur — July 2019 - August 2022

Government Polytechnic, Latur — June 2016 - June 2019

Ahilyadevi High School — Completed June 2016
